

# SR-503 ATIS Infill/Incident Mgt., Fourth Plain to Main St. WSDOT

**Project Completed: June 2018**

## Project Information

RTC funding: \$951,500 CMAQ  
 Total Project Cost: \$1,100,000  
 Project Type: TSMO/Traveler Information  
 Project Length: 8.2 miles  
 Function Class: Urban Principal Arterial  
 Daily Traffic Volume: 32,000

## Project Description

This project installed license plate readers, CCTV Cameras, traffic data stations, and VMS sign to provide traveler information, incident management, and corridor travel times. The project also conducted a signal plan.

## Project Benefits

- Provide traveler information communicated to roadway users via the new VMS sign and WSDOT Website.
- Provide traffic data (counts and travel times).
- Provide additional visual image of traffic (CCTV Camera).
- Improved incident notification and management.
